

## 1. Gorilla®\* Glass

Thanks to its unique surface coating, the filter glass resists even the most adverse environmental conditions such as scratches and shocks or constant contact with the material. Distortion-free and highly light transmissive, this special glass is used for particularly high-quality photo products.

- ▶ Extremely robust and durable
- ▶ High translucency
- ▶ No optical distortion

## 2. Titanium Ring

- ▶ Ideal for the outdoor use
- ▶ Resists huge variation in temperature
- ▶ Dimensionally stable

## 3. Luminance Coating

This special coating considerably increases the resistance of the optical surface to scratches and damage. At the same time, of course, the colour fidelity and light transmission of the various filter models are retained to their full extent.

- ▶ Highest colour fidelity
- ▶ Low reflections
- ▶ Scratch-resistant

## 4. Engineered & Quality Controlled In Germany

- ▶ Strict technical guidelines
- ▶ Individual quality control in Germany
- ▶ Special measuring procedure

Image without CPL filter

## Modus operandi

- ▶ Polarizing filters produce particularly intense colours in blue skies and in the plant world.
- ▶ Polarizing filters suppress unwanted reflections on non-metallic surfaces and enable the viewer of the picture to see through reflective glass and reflective water surfaces.

## Technical Data

<b>F-Stop Reduction</b>	1 stop
<b>Material</b>	Gorilla®* Glass, Ring made of titanium
<b>Scope of delivery</b>	1x Rollei Extremium Round Filter CPL
<b>Available in the Ø</b>	49, 52, 55, 58, 62, 67, 72, 77 and 82 mm
