

The right filter for each horizon

- ▶ Medium graduated filter with 3 stops of light reduction (GND 8 / 0,9) made out of Gorilla®* glass
 - Combination of hard GND and soft GND filter
 - Ideally used for shots of mountains and horizons with protruding elements
- ▶ Reverse graduated filter with 3 stops of light reduction (GND 8 / 0,9) made out of Gorilla®* glass
 - Darkest coating part in the middle of the filter
 - Ideally used for sunrise or sunset
- ▶ Hard graduated filter with 3 stops of light reduction (GND 8 / 0,9) made out of Gorilla®* glass
 - Ideal for uniformly divided areas
 - For straight horizons, clear of obstructions or protruding elements
- ▶ Combine the different filters with each other according to your photo scene
- ▶ Used with the Rollei Pro Square Filter Holder 150 mm
- ▶ Suitable for landscape, architecture, cityscapes, sunset or sunrise photography

1. Gorilla®* glass

- ▶ Extremely robust and durable
- ▶ High translucency
- ▶ No optical distortion

2. Luminance Coating

- ▶ Highest colour fidelity
- ▶ Low reflections
- ▶ Scratch-resistant

3. Engineered & Quality Controlled In Germany

- ▶ Strict technical guidelines
- ▶ Individual quality control in Germany
- ▶ Special measuring procedure

Scope of delivery
