

Firmware Update for the Rollei professional radio transmitter

On the side of the transmitter is the micro-USB port.

1. Connect the switched off radio transmitter via USB to the PC or Mac.
Press and hold the power button of the transmitter. The trigger now appears as a removable disk.
2. Copy the firmware file to the removable disk.
3. When copying is complete, you can release the power button and disconnect the transmitter from the PC by simply disconnecting the USB cable, do not eject the disk!
4. The firmware of the professional radio transmitter is now up to date.
