

Rollei Big Wild Cat Stabilizer

Rollei

- ▶ This nimble steadycam allows free-handed, balanced, smooth and professional video recordings and is particularly suitable for large video DSLR cameras.
- ▶ The counterweights can be used as 3 legs.
- ▶ Anti-skid on the counterweight for a secure footing.
- ▶ Disturbing rotations of the camera can be avoided by the steadycam. The camera can be kept almost constant in height above the ground thanks to the convenient handling (free of force for the arms and hands of the cameraman and therefore almost painless and fatigue-proof).
- ▶ The main part is made of water-proof, light-, heat- and corrosion-resistant carbon. The CNC processing with high quality anodized black finish increases the durability and improves the rigidity of the surface abrasion resistance.
- ▶ Quick release plate with 1/4 inch screw
- ▶ It can also be used as tripod legs. Conversion to monopod possible (Fig. 1–3).

Counterweight

"Big Wild Cat" standard counterweight consists of 4 groups: 142g, 68g, 66g and 46g. Because of its individually usable weights, it decoupled small and medium sized cameras of the naturally given apply impacts of human movement.

Carbon

Quick Release Base

Allows to adjust the front, back, left and right balance.

Quick Lock

Unique 3-leg-quick-lock-system

Handle

The handle can be swiveled horizontally and vertically due to its high quality ball bearings. The covered foam rubber makes the handle more soft and flexible and works also as a sound absorption and heat insulation. Smoothly rotates in all directions.

Base

The 4 groups counterweight for the base enhances the stability and balance.

Big Wild Cat Stabilizer

Weight (net)	1235 g
Weight (incl. counterweight)	2.3 kg
Max. Height	82,5 cm
Min. Height	55 cm
Max. Load	4 kg
Leg Sections	max. 24.5 mm
Material	Carbon
