# Product Installation

## 1. Connect the DashCam-402 with the suction cup mount

Insert the car mount into the car mount slot which is on the top of the dash cam and push it to the left. Connection is ready when you hear a click.

## 2. Mount the suction cup bracket on the glass.

**3. Install the device on at your windshield, adjust the direction of lens to make it horizontal.**

#### **4.The cable routing of front camera to the power supply.**

As shown in the following figure, put the car charger cable along the top of the front windshield, the A-pillar, the passenger's seat, storage box, and plug it to the cigarette lighter.

\*The location of the cigarette lighter port of different vehicles may be different. The above picture is for reference only.

## Directions for use

### 1. Adjust the angle of the DashCam-402

Insert the charger to cigarette lighter, power on, with preview reference on the main menu, rotate the dash cam to adjust the angle of camera, make sure the camera is right on the front of the car.

## 2.Start Recording and The Main Interface

Recording starts automatically when the dashcam is turned on, the flashing red dot on the left above corner means recording right now. If a SD card is not inserted, the dash cam will remind you to insert a memory card. After inserting SD card, the dashcam will run normally.

: Press button to enter the Menu

: Press button for capturing the emergency video, it will show the emergency recording on the left corner, and save it in the emergency video file.
