Content

- 1 Remote control
- 2 Smartphone Holder
- 3 ePano Selfie and USB Cable

Panorama Head with Remote Control

System supported	iOS5.0 or higher, Android (Samsung) 2.3.6 or higher, Bluetooth 3.0 / 4.0
Main function	Remote controlled panorama head for selfie shootings

Parameter

Max. load	500 g
Dimensions	Height: 65 mm Diameter: 58 mm
Weight	100 g
Battery capacity	450 mAh
Working current	2.5 – 4.0 mA
Working voltage	2.4 – 4.2 V
Charging voltage	5.0 V
Charging time	< 8 hours

Please note: The red indicator light turns on while charging. If the device is fully charged, the red indicator light turns off.

Standby time	more than 5 hours
Continuous working time	more than 3 hours (if it is fully charged)
Rated voltage	4.5 V DC
No-load current	max. 65 mA
Rotational speed	2 – 5 r/min
Noise	20 db (A) max

Signal / Indicator Lights:

Red light: Charging indicator – the red indicator light turns on while charging. If the device is fully charged, the red indicator light turns off.

Green light: Bluetooth connection indicator – if the ePano Selfie is not connected with your smartphone via Bluetooth the indicator light flashes green every 1 or 2 seconds. If the devices are connected via Bluetooth the green light turns on and shines permanently.

Blue light: Function and direction change indicator – the blue light flashes blue when a function is changed by pushing a button on the remote control or when the ePano Selfie is changing the rotational direction.

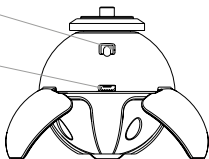

Remote Control:

The ePano Selfie can be controlled by the infrared remote control. The efficient distance is about 5 meters. The remote control has 8 buttons: Power Button, Camera Release Button, Speed Up, Speed Down, Turn Left, Turn Right, Direction Control Button, 10s Button (motor rotates 5 degrees every 10s)

Please note: The ePano Selfie has a lithium battery. The continuous working time is about 3 hours if the device is fully charged.

Charging by USB

1/4" Camera Screw (smartphone holder can be attached here)

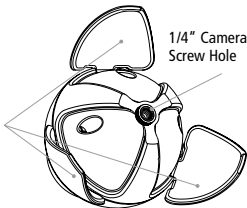

Rotating Panel

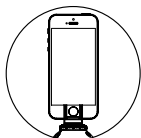

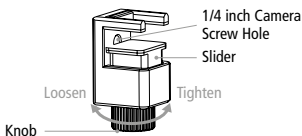

Power button

1/4" Camera Screw Hole

Tripod Stand

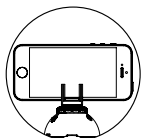

User Guide

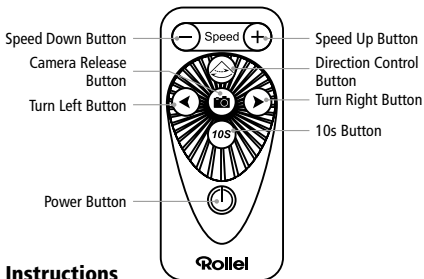

Smartphone vertical shooting [1]

Attach the smartphone holder to the ePano Selfie by using the 1/4 inch universal screw. Then put your smartphone vertically into the mobile phone holder and tighten the phone holder clockwise to secure your smartphone as shown in figure 1.

Smartphone horizontal shooting [2]

Put your smartphone horizontally into the mobile phone holder and tighten the phone holder clockwise to secure your smartphone as shown in figure 2.

Instructions

- 1. Main Power Button:** Press the power button to turn the device on. It will initially flash the blue light. Afterwards the green light will flash which indicates that the ePano Selfie is ready for connecting. Press the power button again to turn off the device.
- 2. Bluetooth Connection:** Turn on the Bluetooth function in your mobile phone and connect the smartphone with the ePano Selfie. If the devices are connected correctly the green light is shining permanently.
- 3. Camera Release Button:** If the ePano Selfie is connectec with your smartphone, open the camera app on your phone. To take pictures you can now press the Camera Release Button on the remote control.
- 4. Speed Up Button:** Press the Speed Up Button to accelerate the rotation of the ePano Selfie. If you press the button the blue light will flash once. If the maximum speed is reached the blue light won't flash anymore when the button is pressed.

- 5. Speed Down Button:** Press the Speed Down Button to decelerate the rotation of the ePano Selfie. If you press the button the blue light will flash once. If the minimum speed is reached the blue light won't flash anymore when the button is pressed.
- 6. Turn Left Button:** Press the Turn Left Button and the ePano Selfie will rotate clockwise.
- 7. Turn Right Button:** Press the Turn Right Button and the ePano Selfie will rotate anticlockwise.
- 8. Direction Control Button:** Press this button and the ePano Selfie will rotate constantly right and left in the range of 90°.
- 9. 10s Button:** Press this button and the ePano Selfie will rotate by 5 degrees every 10 seconds.

Pay attention

1. Do not use chemical solvents to wipe the product.
2. Do not sprinkle strongly acidic substances to the product.
3. Do not put the product into fire and do not heat the battery. Do not store the product in an environment with high temperatures.
4. Do not squeeze or drop the product.
