

Firmware-Update

for the Rollei Professional Radio Transmitter Mark II

On the side of the transmitter is the USB-C port.

1. Press and hold the right function key of the transmitter (see picture in orange) for the whole process.
2. Connect the switched off Radio Transmitter Mark II via USB to the PC or Mac. The trigger now appears as a removable disk.
3. Copy the firmware file to the removable disk.
4. When copying is complete, you can release the function key and disconnect the transmitter from the PC by simply disconnecting the USB cable, do not eject the disk!
5. The firmware of the Professional Radio Transmitter Mark II is now up to date.
